

### Adding the images to the images folder

1. Go to [github.com](https://github.com) and click on dannylitty1/360PicturesFinal on the left side under Top Repositories.
2. Find the branches dropdown under the title 360PicturesFinal.

- 3.
4. Click on master and choose the branch named gh-pages.
5. Click on the folder named src.
6. Click on the folder named main.
7. Click on the folder named resources.
8. Click on the folder named static.
9. Click on the folder named images.
10. Click on the Add file button in the top right.
11. Upload your folder or individual images.
12. When you update the photos.json file, make sure you write the file path with the correct folder hierarchy. Ex. images/216/imagename.jpg **OR**

images/360PicturesBlackBackground.png, -> this one is not inside another folder

### Updating the image names in photos.json

1. Go to [github.com](https://github.com) and click on dannylitty1/360PicturesFinal on the left side under Top Repositories.
2. Find the branches dropdown under the title 360PicturesFinal.
3. Click on master and choose the branch named gh-pages.
4. Click on the folder named src.
5. Click on the folder named main.
6. Click on the folder named resources.
7. Click on the folder named static.
8. Click on the file named photos.json.

9. Click on the code and press any key, then click on the popup that says “switch to the editor”.
10. Add the names of the new photos in the same format, starting with images/ and the name of the folder the photo is in, followed by the name of the image.  
"images/Royce\_City/DSC09622-HDR.jpg",
11. The path should be surrounded with quotes and have a comma after UNLESS it is the LAST entry. Then it does not need a comma afterwards
12. Once you are done updating, click on the green button labeled Commit changes...
13. Add a new commit message if you would like and make sure the option “commit directly to the gh-pages branch” is selected. Then click commit changes.

**Commit changes** [X]

**Commit message**

Update photos.json

**Extended description**

Add an optional extended description...

☒ Commit directly to the gh-pages branch

☐ Create a new branch for this commit and start a pull request
